NGUY VAN THANH

Middle Full-stack Developer (Frontend Major)

Ho Chi Minh City, Vietnam | vanthanhnguy2907@gmail.com | (+84) 702 388 772 | linkedin.com/in/vanthanhnguy

Portfolio: thanhnguy.vercel.app

PROFESSIONAL SUMMARY

• **Middle Full-stack Developer with 5 years of commercial experience**, specializing in modern frontend architecture with primary expertise in **Angular (v15–19, Signals, Standalone Components, RxJS)** and proven production versatility across **Next.js (React)** and **PHP (Laravel CMS)**.

• **Cross-Border Remote Experience (EU Clients):** Extensive experience collaborating in 100% remote, distributed teams with European stakeholders; proficient in asynchronous alignment, cross-timezone delivery, and English technical communication.

• **Enterprise Design Systems & UI Architecture:** Proven track record of designing, publishing, and maintaining shared UI Component Libraries with Storybook, standardizing cross-squad UI consistency, and eliminating code duplication.

• **Performance & State Engineering:** Deep understanding of fine-grained reactivity (Signals), memory leak prevention (custom unsubscription utilities), and change detection performance optimization for complex data grids.

• **Stable Tenure & High-Impact Contracts:** 5 years of stable dedication at Eztek, complemented by trusted freelance delivery on Vietnam's National Educational Resource Hub and British University Vietnam (BUV).

TECHNICAL SKILLS

• **Frontend Core:**	Angular (v15 - v19, Angular Universal SSR), React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, SCSS, TailwindCSS
• **State & Reactivity:**	Angular Signals, RxJS (Advanced Lifecycle & Memory Optimization), Redux Toolkit, Context API
• **Architecture & UI:**	Enterprise UI Component Libraries, Atomic Design, Storybook, MUI X DataGrid Pro, Angular Material, Pixel-perfect Figma-to-Code
• **Backend & CMS:**	PHP (Laravel, Blade Templates, Admin CMS), Server-side DataTables, Node.js basics, RESTful API Integration, Auth0 Security
• **Testing & Workflows:**	Cypress (E2E), Jest, Git Worktrees, AI-Augmented Development (Cursor, Copilot), Agile / Scrum, EU Remote Collaboration

COMMERCIAL EXPERIENCE

EZTEK — **Middle Full-stack Developer / Key Frontend Engineer** Jan 2021 – Dec 2026 (5 Years) | Ho Chi Minh City

Premier software technology consultancy delivering cloud & enterprise solutions for global clients.

1. Accountia — Cloud Accounting Platform & Enterprise UI Library 2023 – 2026 | Team: 10–15

Tech: Angular 19, Signals, NgRx, RxJS, i18n & RTL, TypeScript, SCSS, Storybook, pdf-lib, Cypress

- **Enterprise UI Component Library Owner:** Published and maintained the standalone company UI component library (@genieits/component-library) with Storybook, Chromatic, and ng-packagr, reducing UI regression bugs by over 30% across cross-functional squads.
- **General Ledger (Chart of Accounts) Virtual Grid Engine:** Overcame strict accounting zero-pagination constraints by engineering a custom virtualized hierarchical data grid (1,500+ lines in ExpenseAccountTableComponent). Implemented Angular CDK Virtual Scrolling with OnPush change detection, dynamic CSS Grid template column ordering/visibility toggling, and memoized recursive sub-account toggles, eliminating DOM freeze and lag during chevron expansions across massive datasets.
- **Complex FormBlocks & Multi-Tier Invoice Workflows:** Engineered dynamic FormBlocks and nested FormArrays managing complex invoicing flows: sales drafts, credit notes, partial installment schedules, multi-currency fee lines, and real-time tax recalculations.
- **Angular 19 & Signals Modernization:** Upgraded core modules to Angular 19 Standalone Components, leveraging Angular Signals alongside NgRx store selectors for atomic reactivity on dense financial grids.
- **i18n & Bidirectional RTL Layout:** Implemented angular-l10n localization supporting English, Arabic, and Kurdish with dynamic Right-to-Left (RTL) styling and zero layout reflows.

- **Client-Side Document Engines:** Integrated pdf-lib and jsPDF for instant in-browser financial previews, print layouts, and digital invoice generation.

2. Layer Marketplace Platform — Esports & Gaming Sponsorship 2022 – 2023 | Team: 10–15

Tech: Next.js (React), TypeScript, TailwindCSS, Redux Toolkit, MUI X DataGrid Pro, Auth0, Chart.js, Storybook, Cypress

- **Dynamic Marketplace Workflows:** Developed user journeys for proposal submissions, game directories, and deal negotiations using Next.js and Redux Toolkit.
- **High-Density Data Grid:** Configured MUI X DataGrid Pro with server-side sorting, multi-column filtering, and inline actions to handle high-volume sponsorship match listings smoothly.
- **Analytics & Visualization:** Built interactive gamer demographic and viewer reach dashboards utilizing Chart.js.
- **Enterprise Authentication:** Integrated Auth0 (@auth0/nextjs-auth0) for secure role-based session protection and client-side route guards.

3. Tech2B Platform — Dutch Manufacturing B2B Ecosystem 2021 – 2023 | 3,940+ Commits (kenho) | Core Frontend Lead

Tech: Angular, Angular Universal (SSR), Autodesk APS (Forge 3D CAD), NgRx, CometChat, Google Maps Clusterer, ApexCharts

- **Core Frontend Contributor:** Authored 3,940+ commits driving frontend development for the Dutch manufacturing platform officially recognized as an **Autodesk Customer Story**.
- **In-Browser 3D CAD Engine (Autodesk APS / Forge):** Integrated Autodesk Platform Services with custom Three.js extensions (theming colors, ViewCube UI front/back, selection events), allowing thousands of EU suppliers to inspect 3D engineering models without expensive CAD licenses.
- **Multi-Level FormBlocks & Deep Categories:** Built complex nested FormArrays and dynamic categories popovers for eSourcing requests, RFQ quotes, order creation, and multi-tier manufacturing specifications.
- **Realtime B2B Messaging (CometChat):** Integrated CometChat Pro with document-linked discussion rooms bound directly to specific quotations, purchase orders, and technical drawings.
- **Domain-Driven NgRx Store:** Partitioned client state into dedicated store modules (analytics, company, document, order, message) with LocalStorage sync and memoized selectors.
- **Angular Universal SSR & Maps Clustering:** Configured SSR with domino mocking for 35% faster initial page loads and superior SEO; integrated Google Maps clusterer for thousands of EU manufacturing workshops.

INDEPENDENT CONTRACTS & FREELANCE ENGAGEMENTS

HighscoresAI — AI Standardized Test Prep & Interactive IDE (SAT, ACT, AP) Current | Team: 4

Tech: Next.js (App Router), TypeScript, TailwindCSS, CodeMirror 6, FullCalendar, dnd-kit, AI/LLM, Git Worktrees

- **Standardized Exam Prep:** Developed modular assessment engines supporting timed mock exams, multi-section routing, and question flagging conforming strictly to standardized digital testing patterns (CollegeBoard BlueBook specs).
- **In-Browser Code Editor & Terminal:** Integrated CodeMirror 6 (Python, Java, C++, JS) with real-time autocompletion, linting, and xterm.js terminal integration for AP Computer Science curricula.
- **Clean Architecture & Worktrees:** Applied strict Clean Code patterns across 30+ domain modules; utilized Git Worktrees for concurrent feature branch development during rapid release sprints.

Trục học liệu số - NXB Giáo dục Việt Nam (Hợp tác cùng VTC) Dec 2025 – May 2026 | Outsourced via VTC

Tech: PHP (Laravel), Blade Templates, VTC AI Grading APIs, Server-side DataTables, S3, Redis

- **Modular Admin CMS:** Developed clean, modular administration panels and management views using Laravel Blade templates and SCSS for national-scale educational assets.
- **Server-Side DataTables & Nested Sets:** Implemented dynamic DataTables with server-side pagination and multi-criteria filtering; handled hierarchical curriculum taxonomies with nested set trees across 700k+ learning resources.
- **AI Grading & OCR Integration:** Connected the Teacher Portal (webgiaovien) with VTC AI backend microservices for automated document OCR extraction and automatic quiz/essay scoring (VtcAiService).

British University Vietnam (BUV) — Flagship Portal & SOT Design System Jul 2026 – Aug 2026 | Turborepo Monorepo (Next.js 15 & React 19)

Tech: Next.js 15, React 19, Turborepo, Source of Truth (/sot), Playwright Pixelmatch, SCSS

- **Dedicated Source of Truth (/sot) Component Gallery:** Architected the in-app /sot showroom rendering real production components wrapped in design token inspectors, preventing component drift from British university standards.

- **Automated Visual Regression Testing:** Setup CI-gated design-parity workflows utilizing Playwright, Pixelmatch, and Sharp to enforce pixel-perfect fidelity against Figma specifications.
- **Modern Monorepo Architecture:** Contributed inside a Turborepo monorepo setup running Next.js 15 and React 19 with modular core and UI packages.

EDUCATION & LANGUAGES

- **Education:** **Engineer's Degree in Information Technology** — Saigon Technology University (STU)
- **Languages:** **English:** Professional Working Proficiency (TOEIC Equivalent ~700 / Technical reading, documentation, and live conversational communication) | **Vietnamese:** Native
