NGUY VAN THANH

Middle Full-stack Developer (Frontend Major)

Ho Chi Minh City, Vietnam | vanthanhnguy2907@gmail.com | (+84) 702 388 772 | linkedin.com/in/vanthanhnguy

Portfolio: thanhnguy.vercel.app

PROFESSIONAL SUMMARY

• **Middle Full-stack Developer with 5 years of commercial experience**, specializing in modern frontend architecture with primary expertise in **Angular (v15–19, Signals, Standalone Components, RxJS)** and proven production versatility across **Next.js (React)** and **PHP (Laravel CMS)**.

• **Cross-Border Remote Experience (EU Clients):** Extensive experience collaborating in 100% remote, distributed teams with European stakeholders; proficient in asynchronous alignment, cross-timezone delivery, and English technical communication.

• **Enterprise Design Systems & UI Architecture:** Proven track record of designing, publishing, and maintaining shared UI Component Libraries with Storybook, standardizing cross-squad UI consistency, and eliminating code duplication.

• **Performance & State Engineering:** Deep understanding of fine-grained reactivity (Signals), memory leak prevention (custom unsubscription utilities), and change detection performance optimization for complex data grids.

• **Stable Tenure & High-Impact Contracts:** 5 years of stable dedication at Eztek, complemented by trusted freelance delivery on Vietnam's National Educational Resource Hub and British University Vietnam (BUV).

TECHNICAL SKILLS

• **Frontend Core:**	Angular (v15 - v19, Angular Universal SSR), React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, SCSS, TailwindCSS
• **State & Reactivity:**	Angular Signals, RxJS (Advanced Lifecycle & Memory Optimization), Redux Toolkit, Context API
• **Architecture & UI:**	Enterprise UI Component Libraries, Atomic Design, Storybook, MUI X DataGrid Pro, Angular Material, Pixel-perfect Figma-to-Code
• **Backend & CMS:**	PHP (Laravel, Blade Templates, Admin CMS), Server-side DataTables, Node.js basics, RESTful API Integration, Auth0 Security
• **Testing & Workflows:**	Cypress (E2E), Jest, Git Worktrees, AI-Augmented Development (Cursor, Copilot), Agile / Scrum, EU Remote Collaboration

COMMERCIAL EXPERIENCE

EZTEK — **Middle Full-stack Developer / Key Frontend Engineer** Jan 2021 – Dec 2026 (5 Years) | Ho Chi Minh City

Premier software technology consultancy delivering cloud & enterprise solutions for global clients.

1. Accountia — Cloud Accounting Platform & Enterprise UI Library (Core Focus) Oct 2023 – Sep 2026 (3 Years) | Team: 10–15

Tech: Angular 19, Signals, Standalone Components, RxJS, TypeScript, SCSS, Storybook, Cypress

- **Core UI Library Architecture:** Architected and published a centralized Enterprise UI Component Library serving as the single source of truth for UI components across cross-functional squads.
- **Storybook Isolation:** Integrated Storybook to document and test reusable components (modals, complex form controls, data grids) independently from core business logic, reducing UI regression bugs by over 30%.
- **Angular 19 & Signals:** Upgraded core modules to Angular 19 Standalone Components and leveraged Signals to optimize fine-grained reactivity, eliminating redundant change detection on dense numeric financial grids.
- **Memory Management:** Enforced deterministic RxJS unsubscription patterns (takeUntilDestroy) across component lifecycles to prevent memory leaks in continuous financial streams.
- **EU Client Remote Collaboration:** Collaborated directly with European product stakeholders in English sprint groomings, architectural reviews, and asynchronous remote workflows.

2. Tech2B Platform — B2B Commerce & Workflow System (Core Focus) Jan 2021 – Sep 2023 (2 Years 9 Months) | Team: 4

Tech: Angular, Angular Universal (SSR), TypeScript, SCSS, RxJS, Node.js, RESTful APIs

- **Angular Universal SSR:** Implemented Server-Side Rendering with Angular Universal for public product catalogs, slashing initial load latency by over 35% and boosting SEO indexing for B2B search discovery.
- **Autodesk Customer Story:** Featured as an official Autodesk Customer Story for innovation in engineering workflow automation.
- **Reactive State & Forms:** Developed complex multi-step reactive checkout workflows and automated supplier inquiry handling with Angular Reactive Forms.
- **Resilient Networking:** Engineered centralized HTTP interceptors for automatic JWT token injection, caching, and unified error handling.

3. Layer Marketplace Platform — Esports & Gaming Sponsorship (Parallel Engagement) Jun 2023 – Sep 2023 (4 Months) | Team: 10–15

Tech: Next.js (React), TypeScript, TailwindCSS, Redux Toolkit, MUI X DataGrid Pro, Auth0

- **Marketplace Workflow Modules:** Developed proposal listing screens and deal negotiation views using Next.js and Redux Toolkit.
- **High-Density Data Grid:** Configured MUI X DataGrid Pro with server-side sorting, multi-column filtering, and export to handle high-volume sponsorship matches smoothly.
- **Authentication:** Integrated Auth0 for secure role-based session handling and client-side route protection.

INDEPENDENT CONTRACTS & FREELANCE ENGAGEMENTS

HighscoresAI — AI Standardized Test Prep & Interactive IDE (SAT, ACT, AP) Current | Team: 4

Tech: Next.js (App Router), TypeScript, TailwindCSS, CodeMirror 6, FullCalendar, dnd-kit, AI/LLM, Git Worktrees

- **Standardized Exam Prep:** Developed modular assessment engines supporting timed mock exams, multi-section routing, and question flagging conforming strictly to standardized digital testing patterns (CollegeBoard BlueBook specs).
- **In-Browser Code Editor:** Integrated CodeMirror 6 (multi-language: Python, Java, C++, JS) with real-time autocompletion, linting, and sub-second feedback via backend execution sandbox for AP Computer Science curricula.
- **Clean Architecture & Worktrees:** Applied strict Clean Code patterns across 30+ domain modules; utilized Git Worktrees for concurrent feature branch development during rapid release sprints.

Trục Học Liệu Quốc Gia (giaoducso) — National Educational Resource Hub Dec 2025 – May 2026 | Team: 20–30

Tech: PHP (Laravel), Blade Templates, SCSS, JavaScript, Server-side DataTables, RESTful APIs

- **Modular Admin CMS:** Developed clean, modular administration panels and management views using Laravel Blade templates and SCSS for national-scale educational assets.
- **Server-Side DataTables:** Implemented dynamic DataTables with server-side pagination, multi-criteria filtering, and bulk operations ensuring high-performance handling of vast resource libraries.
- **API Consumption:** Collaborated with backend engineers to bind RESTful endpoints into administrative forms with strict data integrity validation.

British University Vietnam (BUV) — Flagship Digital Portal & SOT System Jul 2026 – Aug 2026 | Team: ~20 (Design Studio + 2–3 Devs)

Tech: Modern Web Frontend, SCSS, Responsive Web Design, Figma-to-Code, Semantic HTML5

- **Pixel-Perfect Execution:** Translated complex, design-heavy Figma layouts into clean, semantic markup with exact typography scales, color palettes, and responsive breakpoints.
- **Source of Truth (SOT) Pages:** Developed core standardized SOT page templates serving as the structural blueprint for academic documentation and student notices.
- **Cross-Browser Precision:** Ensured 100% responsiveness with zero visual regressions across all modern browsers (Chrome, Safari, Edge, Firefox).

EDUCATION & LANGUAGES

- **Education:** **Engineer's Degree in Information Technology** — Saigon Technology University (STU)
- **Languages:** **English:** Professional Working Proficiency (TOEIC Equivalent ~700 / Technical reading, documentation, and live conversational communication) | **Vietnamese:** Native
